

Where as ⟨+ Pl.⟩ Art reveals that in all periods there is /
in all Art a “something” that is identic it /
shows that it is “time” that causes the changes, /
progress, evolution. ⟨- Thus⟩ Science says there /
is no time, no evolution, in reality. So /
shows Art. Really there is no time, no /
evolution in Pl. Art. There is perfect move- /
ment, dynamics, thus in rest. There is space : /
nothing. Pl. Art is an expression of that space /
and the truer it does this, the greater Art /
will be. But for us subjective being, /
there is time, there is changes, there is /
evolution. ⟨+ Pl.⟩ Art shows that to get rid /
of this subj. seeing, is ⟨+ Pl.⟩ Art’s evolution. //

Our subj. seeing has to express dynamic /
movement this is Art real content. All /
subjectivity is superfluous. We have to /
find the most unchangeable forms and the /
purest relations of them ⟨- can only⟩ ⟨+ to⟩ establish /
⟨- great art must⟩ unchangeable, space, /
movement. ///
